

Worksite of the Month: April 2010

WV DHHR - McDowell County

McDowell County DHHR makes the Pathways to Wellness Program part of their working routine by demonstrating healthy living all year long. The worksite coordinator, Linda Bishop, is instrumental in making sure everyone is aware of all the advantages the Pathways program has to offer. McDowell County DHHR has been in the Pathways program since 2003 and always had a successful health screening. They do a great job of incorporating others such as family members and off-site employees to attend. They also are active in participating in the lifestyle change programs and continue a walking program throughout the year.

I enjoy seeing their smiling faces every time I walk in the building.

Keep up the great work!
