

Worksite of the Month: August 2009

WV Development Office (Kanawha County)

The worksite coordinator, Ms. Debbie Browning, has done a wonderful job at promoting worksite wellness. Her participation numbers for the health screens have increased every year since their start in the program, most notably a 50 % jump in 2009. The WV Development Office has always stayed in compliance with the PEIA Pathways Program, always completing at least one educational tool program, along with doing the Weigh-To-Go program during the holidays. Debbie has also been consistent in returning the pre and post surveys.

Along with our lifestyle change programs, the WV Development Office participated in the Governor's Walking Lunch and helps with the Capitol Farmer's Market. They conduct a lunch and learn at least once a year and does a flu shot clinic yearly. It has been a pleasure to have such a good worksite that is interested in the wellness of their employees.
