

Worksite of the Month: August 2010

WV DHHR - Mingo County

The worksite coordinator, Chris Dotson, has done a wonderful job of promoting the benefits of the Pathways to Wellness program. She is the perfect example of what a worksite coordinator should be. She has always turned in her operating plan, gathered the same amount of pre and post surveys for the lifestyle change programs which is the hardest job to do as a coordinator. She always gets way above the 50% participation rate that is required for the program in regards to health screenings. Thank you Chris for doing such a great job!
