

## **Worksite of the Month: February 2012**

### **WV Division of Natural Resources (Upshur County)**

The WV DNR office located in French Creek has been a participating worksite in the Pathways to Wellness Program for almost three years now. In their first year in the program they had 92% of their employees participate in the health screening. In their second year, they almost doubled the amount of participants at their health screening from the previous year! This was credited to their worksite coordinator, Judy Channell, who did an excellent job of promoting the health screening not only to her own worksite's employees, but also to other PEIA members in Upshur County. Judy is very experienced and familiar with the Pathways program. She had served as the coordinator for several years at another worksite in Barbour County before coming to the WV DNR. Thank you Judy for all of your hard work!
