

Worksite of the Month: May 2010

Craigsville Elementary - Nicholas County

Craigsville Elementary has been a PEIA Pathways to Wellness Worksite since 2004. The Worksite Coordinator, Mary Griffith, works diligently to not only incorporate fitness in her students' lives, but the staff as well. Ms. Griffith not only encourages the staff at Craigsville to participate in the health screening she also invites the community and surrounding schools to take advantage of what the health screens have to offer. Craigsville Elementary has successfully completed many Lifestyle Change Programs over the years and has been represented at our Worksite Coordinator Trainings every year since their application. Mary Griffith and the staff at Craigsville Elementary are a joy to work with and are dedicated to not only working fitness into their lives, but also setting an example for their students.
