

**Worksite of the Month: November 2008**

**Tunnelton-Denver Elementary**

This school has proven to be a prime model of the Pathways to Wellness program by providing continuous health promotion to not only the school, but throughout the community as well. Although they have only been in the program for 2 years, the worksite coordinator Brenda McGinnis has gone above and beyond making sure the health screenings, lifestyle change programs and educational materials are available to all PEIA members and their families in the region. Congratulations to Brenda and her school for doing such a fine job!
