

Worksite of the Month: October 2009

Mineral and Hampshire County DHHR's

Mineral and Hampshire County DHHR's have been active worksites in the Pathways to Wellness Program for the past 10 years. They are lead jointly by worksite coordinator Madonna Pyles who works tirelessly to provide lifestyle change programs to her fellow employees on a regular basis. They were both a recipient of a grant through the Pathways grant program several years ago that helped them to establish an employee health resource library. They also make use of a *Pathways to Wellness* bulletin board to announce upcoming programs and display monthly educational materials. They have just recently been awarded a CPR Friends and Family grant that they will be doing with both Hampshire and Mineral County DHHR worksites. Keep up the good work Madonna!
