

Worksite of the Month: October 2011

WV DOT/DOH - Randolph County

Worksite Coordinator: Sue Sheets

The WV Department of Highways located in Elkins has been an active member of the Pathways to Wellness program for 10 years. They consistently have a very successful health screening with close to 150 participants every year. They stay active with participation in all lifestyle change programs that are offered to them. Their success is due in large part to their worksite coordinator, Sue Sheets, who keeps on top of all available programs and any extra wellness programming she can come up with.
